

Technology solutions that work for your business

A PARTNER YOU CAN TRUST

Office Technology Relocation and Infrastructure Build-out

Business Technology

Implementing technology is critical to your business success, yet where do you start?

Where do you go for help?

You need a technology partner who takes the time to understand the uniqueness of your business and operations. A partner who brings the best technology solutions to meet your business challenges and provides complete systems integration, service and support.

A partner with extensive experience in these critical areas:

Communication Systems

Carrier Services

IT Networking

Computers and Servers

Security and Access

Cable and Infrastructure

One Trusted Technology Partner

**Northern
Communications
Group**

Your Complete Telecom and IT
Networking Solutions Provider

NCG will provide a Relocation Engineer who will plan, oversee and coordinate the move to include your phone system, computers, network components and peripheral devices.

NCG Technology Relocation Services

- Pre-move site survey of new office space and facility including existing cable infrastructure testing if requested
- Pre-move planning meeting with Relocation Engineer to gather system details and review plan
- Carrier coordination and placement of move orders for voice and data lines
- Phone system moves, reprogramming and re-installation including full component testing
- Computer network/hardware moves including servers and desktops with full OS testing
- Auxiliary equipment moves (cameras, security)
- Phone closet and data center relocation of all hardware components and network devices
- Post-move support for any additional system changes required day-of-move and ongoing

Relocating your business is one of the most time-consuming and complex processes you can undergo. Addressing the specific requirements of moving your communications systems, servers and computers, network hardware and auxiliary equipment along with your voice and data circuits can be a daunting task.

NCG has successfully moved hundreds of clients and will provide a complete technology relocation service to insure a smooth transition to your new facility.

New Infrastructure Builds

- Installation of new voice and data cabling (Cat 3, 5, 6 or Fiber), wall jacks and hardware
- New feed cabling from carrier demark to MDF and backbone to IDFs
- Design and build-out of new data center racking, cable management and phone closet hardware
- Design and installation of IT network components (routers, switches, firewalls)
