

Technology solutions that work for your business

A PARTNER YOU CAN TRUST

Technology Maintenance Service and Support

Business Technology

Implementing technology is critical to your business success, yet where do you start?

Where do you go for help?

You need a technology partner who takes the time to understand the uniqueness of your business and operations. A partner who brings the best technology solutions to meet your business challenges and provides complete systems integration, service and support.

A partner with extensive experience in these critical areas:

Communication Systems

Carrier Services

IT Networking

Computers and Servers

Security and Access

Cable and Infrastructure

One Trusted Technology Partner

**Northern
Communications
Group**

Your Complete Telecom and IT
Networking Solutions Provider

Adopting new technology for your business is often expensive and can be disruptive to familiar processes and procedures. Productivity can be drastically impacted. Your existing technology may still have useable life remaining, so why change it unnecessarily?

NCG specializes in maintaining your existing technology, systems and equipment before we propose new. We evaluate your systems to determine their maximum supportability and life expectancy, then develop a specific technology migration timeline for your company.

This approach allows you to plan for technology adoption, address culture shock and control when your business is ready for new technology, instead of being forced into buying expensive equipment and experiencing unfamiliar processes before you are prepared.

Major Phone Systems Supported

AT&T	Atlas	Avaya	Cisco	Comdial
ESI	Fujitsu	Inter-Tel	ITT	Iwatsu
Lucent	MacroTel	Mitel	NEC	Nitsuko
Nortel	Panasonic	Samsung	Telrad	PhoneSuite
